PERSONAL PROJECTS

Automotive Artificial Intelligence (08/2019 - 08/2021)

- Responsible for defining, developing, and automating tests and processes in an agile development environment using the latest software testing methods and infrastructure. When I joined AAI, mainly traffic testing was done manually. There were some unit tests but not smoke or regression tests automated for traffic, with the help of developers we created a framework in c++ so that we can automate tests efficiently
